Summary

Computer Science and Engineering undergraduate at VIT Bhopal (2027 batch) with working knowledge of **Java, Python, and SQL (basic)**, basic Data Structures and Algorithms, Object-Oriented Programming, and DBMS. Built full-stack and security-focused software projects, testing and debugging them end to end. Strong teamwork and communication, shown by leading a **200+ member** student club and campus events, and quick to adapt to new tools and environments. Open to both technical and non-technical roles, and **willing to work night shifts in Indore**. Seeking the **American Chase campus placement drive**.

Technical Skills

Languages: Java, Python, SQL (basic), C++
CS Fundamentals: Data Structures and Algorithms (basic), Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
AI and GenAI: Applied generative AI including Google Gemini, prompt engineering, automation framework design and adoption
Development: Git and GitHub, debugging and unit testing, eager to build hands-on expertise in REST APIs and cloud platforms
Professional: Problem Solving, Debugging, Teamwork, Adaptability, Communication, Fast Learning

Education

Vellore Institute of Technology (VIT), Bhopal Aug 2023 – Aug 2027
B.Tech, Computer Science and Engineering
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks.

Technical Projects

SecondSons — Full-Stack Super-App with Text-to-Speech Personal Project
- Conceived and built a full-stack super-app that consolidates multiple everyday utilities into a single platform, working across the frontend, backend, and data layers end to end.
- Designed and implemented a text-to-speech feature that converts written content into natural spoken audio, improving accessibility for users with visual impairments or reading difficulties.
- Manually tested and debugged the application across multiple scenarios, identifying and resolving edge cases to ensure consistent, reliable performance.

Secure File Transfer Platform Personal Project
- Built a platform focused on securely transferring files between users while protecting data from unauthorized access during transit.
- Implemented core security measures such as encryption and access controls to safeguard file integrity and confidentiality throughout the transfer process.
- Designed and validated the system architecture end to end, from file upload through secure transmission to retrieval, catching inconsistencies before they reached users.

Leadership Experience

Google Student Ambassador — Gemini AI 2026 – Present
Google x VIT Bhopal University
- Drove Gemini AI adoption across campus through **15+ workshops**, live demos, and social content, reaching **500+ students**.
- Built and refined reusable prompt automation frameworks adopted by **50+ students**, reducing repetitive manual work in content creation.

President, Hindi Club 2025 – Present
VIT Bhopal
- Lead a student organization of over **200 members**, setting strategy and delegating ownership across a core team to run more than **10 cultural and literary events**.

Stage Team Lead, Central India Club | General Secretary, Ganga Bhumi Club 2025 – Present
VIT Bhopal
- Led stage operations for events drawing **1,000+ attendees**, emceeing alongside state dignitaries, while coordinating cross-team logistics and communications for club initiatives.

Certifications

- **Deloitte Australia — Technology Job Simulation**, completed via Forage, June 2026.
- **Deloitte Australia — Data Analytics Job Simulation**, completed via Forage, June 2026.
- **Deloitte Australia — Cyber Security Job Simulation**, completed via Forage, June 2026.

Achievements

- **1st Prize**, VIT Bhopal Freshers' Talent Show 2023 — competed against 300+ participants university-wide.
- **3rd Prize**, Slam Poetry, IIT Jodhpur National Summit — recognized for communication and on-the-spot thinking.
- **Selected as Judge**, TechCorp Summit — evaluated innovation and technical presentations.
